But these ladies have moved my heart and mind to the point where I can no longer bear the status quo. This is the real-life story of a successful man, a single father, and a wanna-be romance guru.' Dear readers, does this tagline make you curious about what will be covered in this book? Let me give you a sneak peek. Ladies, here's an excerpt: "I met the love guru." She knew it the moment she heard the voice, the deep sexy voice. "I knew I was home." "I knew I was home." That's a twist! It's a literary twist, so it won't be in the form of paragraphs or sentences. In order to preserve the magic, I haven't included the beginning or the end. You'll just have to trust me and read the whole thing. When I was growing up in the '80s and '90s, women had limited access to romance as we know it. Books were not the main source of information or inspiration. We had little access to media and the movies. Most of our ideas about romance came from friends and parents. We learned about sex education from TV, and movies were full of steamy scenes. I mean, think of movies from that time period. Pretty much all of them were about "love conquers all." Nobody ever spoke about the dark side of relationships, like infidelity. No one spoke about jealousy and possessiveness. No one thought of a woman as a goddess and a man as a god. Then came the internet and information flooded our lives. From "Like" on Facebook to sending random "jokes" on Snapchat, we got bombarded with multiple messages every day. We learned more about relationships and love than ever before. Relationships became more complex and multifaceted. Women got to participate more in the dating process, and the male-female dynamic changed a lot. At the same time, people were still pretty much stuck in the mindsets of the '70s and '80s, even though we'd all been born in the '90s. Then there was me. I wanted to know more, because I had a feeling I'd been missing something, something very important, and I just had to find it. In the course of my research 82157476af
